LinkedIn: linkedin.com/in/cadinmcqueen | Github: github.com/Awfulnaut | Portfolio: awfulnaut.github.io

Full-stack web developer with a background in Biology and a keen eye for clean, intuitive UX. Effectively communicates with design team to push user-friendly solutions live. Known for fearlessly taking on new challenges and constantly finding ways to work virtual reality into conversation.

Technical skills: HTML5, CSS3, Sass, Javascript (ES6), React, jQuery, Node, MySQL, Sequelize, Mongo, Mongoose, Express, Handlebars, Twig, git

PROJECTS
Recca | github.com/recca-social/Recca
Search, save, and track your progress for your favorite media (shows, movies, books, music, games) and make recommendations to friends in this collaborative full-stack MERN app.
- Built out core media pages, created and parsed external API calls, implemented Sass styles
- Technologies: Mongo, Mongoose, Express, React, Node, Javascript, Sass, Heroku

Self-Improvement Kingdom | github.com/Awfulnaut/SI-Kingdom
Build your army and battle your way to self-improvement in this full-stack, gamified task manager.
- Oversaw front-end implementation, client-side ajax requests, and managed git collaboration
- Technologies: Heroku, Node, Express, Sequelize, MySQL, Passport, Handlebars, Javascript, jQuery, Bootstrap, CSS, HTML

EXPERIENCE
Trilogy Education, Philadelphia, PA
Teaching Assistant, 2019 - Present
Part time assistant at the University of Pennsylvania Coding Bootcamp helping teach students to learn HTML, CSS, Bootstrap, Git, Javascript/ES6, jQuery, Node, Express, MySQL, Mongo, and React.

Digital Wave, Huntingdon Valley, PA
Web Developer, 2016 - Present
Builds front-end architectures for clients in education and healthcare using HTML, CSS, Sass, Javascript, jQuery, Twig, and git. Coordinates with the design and UX teams to implement web solutions for clients on Drupal and Wordpress.
- Developed modular, backend aware components to increase development speed
- Improved site load times and development workflow by implementing Gulp
- Performed user testing to build truly user-centric experiences

Glencairn Museum, Bryn Athyn, PA
Web Developer, 2015 - 2016
Organized and executed the redesign process of Glencairn Museum's website at glencairnmuseum.org. Advised client on design decisions and implemented new site structure. Trained museum staff on using the new site to maintain content autonomously.
